ERP DOCUMENT

AITAM believes in simple and automated system to provide governance to achieve different elements of the academic system. Various functions to be implemented for effecting planning, development, administration, management of finances and accounts, providing support to the students such as proving hostel facilities, organizing the examinations and evaluations etc., have been considered as a set of modules. Each module is separately designed and implemented through an in-house developed ERP system. All functionaries and administrators use the ERP system for providing the e-governance. Transparency of everything done in the college is exhibited through the ERP system. The ERP system has been built with interface to the AITAM web site for hosting all important contents that must be made known to the stake holders of the college.
